Preface

The third Committee Meeting of the Glaucoma Society of the International Congress of Ophthalmology was held in Bussum, Netherlands, September 11–14, 1986. Traditionally this is a closed meeting, held under the auspices of the International Council of Ophthalmology. About 80 experts on glaucoma—active members of the Committee and invited guests—discussed the latest progress in glaucoma research. The quite informal scientific lectures, presented in this book, provided the nucleus for a stimulating and fruitful discussion.

The scientific program was prepared by Stephan M. Drance (Vancouver) and Jack Hetherington, Jr. (San Francisco), and the local organization was in the hands of Erik L. Greve (Amsterdam) and his group.

The Society is indebted to Chibret International for its generous support of the meeting and to Pharm Allergan (Germany) for its generous assistance in covering a large portion of the printing expenses. Finally the editor wishes to thank Springer-Verlag for making it possible for this book to be published within such short timespan.
