Glaucoma Update VI

With 41 Figures

Springer
Preface

On 14–18 June 1998, the closed meeting of the Glaucoma Society of the International Congress of Ophthalmology was held in Edinburgh, Scotland. Following tradition, the meeting preceded the International Congress of Ophthalmology and was attended by the members of the society and invited guests. The structure of the scientific program and the local organization was in the hands of Roger Hitchings, London. The aim of the meeting was to exchange information regarding the latest progress in worldwide glaucoma research – basic aspects as well as clinical applications – with ample discussion time between the individual scientific presentations. The number of attendees was limited to favor a maximum amount of discussion.

*Glaucoma Update VI* comprises the scientific presentations of this meeting now available for everyone interested in glaucoma research and its clinical use to improve the care of our patients.

The society is indebted to both Pharmacia and Upjohn, Germany, for supporting the printing expenses of this proceeding volume so generously, and Springer Verlag, Heidelberg, for printing in a timely fashion.
